

The Future of Testing. ▶ ▶ Automated by AI

100% Secure

Data Security: Your data stays private, whether in the cloud or on-premise.

100% Integrated
Integrated in *ecu.test*:
No chatbots – just seamless automation.

Ready to Accelerate Your Testing?

Experience the future of testing with AI-powered automation. Talk to our experts and see how it works – get in touch with us!

Accelerate Test Case Creation
Automatically transform specifications into precise, executable test steps with a single click.

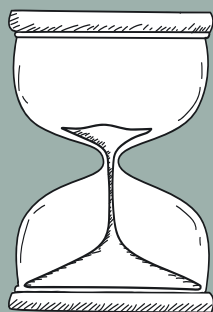

Effortlessly Scale Up
Manage increasing software complexity and test volume without the headache.

Eliminate Repetitive Tasks
Let *ecu.test agent* handle time-consuming, repetitive work – so you don't have to.

The Solution you Need for Test Case Creation

Test case creation takes up to **40%** of testing time – **AI** reduces this to minutes.

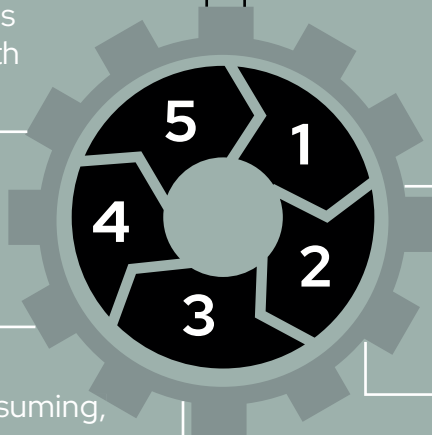

More time for what matters.

100%

100% Fun

Working with New Technology: It's like upgrading from a bicycle to a bullet train.

ecu.test agent

Meet *ecu.test agent*, your AI-powered assistant for smarter, faster testing. It automates time-consuming tasks in test case creation, freeing up your team for real innovation.

Seamless Integration: Directly connects with configured tools and bus systems in *ecu.test*.

Automated Test Generation: Creates test steps in *ecu.test* packages based on specific contexts.

Choose Your own AI: Cloud or on-premise, with support for ChatGPT, Gemini, Llama, and more.

Why Choose *ecu.test agent*?

With *ecu.test agent*, you gain more than just automation – you gain a highly reliable way to create and manage test cases.

Boost Efficiency and Quality
Achieve consistent, homogeneous test cases with 90% accuracy – far less manual mistakes.

Save Time and Costs
Cut down on test case creation effort with intelligent AI-powered automation.

Fun Fact ↘

We originally wanted to build a chatbot, but we realized that typing is just as tedious as creating test cases manually. That's why we trained the AI with the know-how of our experts to do the job on its own.
